PRE-TRAVEL

TEST-CALL STUDY PLAYBOOK

A practical guide to the conversation, the decision, and the system action.

01 CONNECT	02 VERIFY	03 UNDERSTAND	04 RESOLVE	05 DOCUMENT

THE PURPOSE

Do not memorise 100 separate scripts. Learn one repeatable call structure, then choose the correct GDPR route, booking action, system process, and follow-up for the situation.

Built from your supplied training notes | English edition | Revision 1

Use as a study aid. Live TUI policy, current system prompts and manager guidance always take priority.

01 / STUDY MAP

How to use this pack

This guide is organised in the order your brain should work during a test call. Learn the decision logic first, then use the system reference pages to support it.

CALL OPENS	WHO IS CALLING?	GDPR ROUTE	WHAT DO THEY NEED?	SYSTEM + POLICY	CONFIRM + NOTE

Your learning order

Priority	Master this	Why it matters
1	Call control + GDPR	You cannot safely solve a booking query until the caller and authority are verified.
2	Understand and clarify	Correctly identifying the requested outcome prevents wrong amendments and repeat contacts.
3	System decision	Choose the correct platform and service line: C4C, ATCOM, SkySpeed, payment or specialist team.
4	Policy + money	Fees, deposits, cancellation rules, incentives and refund routes are high-risk.
5	Read-back + memo	The customer must understand the result; the booking history must show exactly what happened.

Contents at a glance

Section	What you will be able to do
02–04	Run a call smoothly, ask strong questions, choose the correct GDPR path.
05–08	Navigate ATCOM actions, handle amendments, fees, cancellations and payments.
09–11	Use codes and memos, work with C4C, and route cases to the right team.
12–14	Offer relevant extras, know the operational reference codes and key timings.
15–18	Handle test-call scenarios, avoid critical errors, and practise using recall.

COLOUR KEY / HOW TO READ THIS GUIDE

ASK / EXPLORE	VERIFY / STOP	PROCEED	POLICY / MONEY	SYSTEM ACTION	MEMO / CASE

THE GOLDEN RULE

Never let a system step lead the conversation. First understand the customer's request and verify authority. Then decide what the system action should be.

Suggested method: read one section, close the document, explain the decision logic out loud, then test yourself with the scenario at the end of that section.

02 / CORE SKILL

The master call flow

1 WELCOME	2 IDENTIFY	3 VERIFY	4 DISCOVER	5 CHECK	6 RESOLVE	7 READ BACK	8 MEMO + CLOSE

The 8-step call structure

Step	What you do	Useful language
1. Welcome	Warm, professional, clear pace. Use the correct team greeting.	“Good morning, thank you for calling TUI. You’re through to [name]. How can I help?”
2. Identify	Ask who is speaking and establish caller type: customer, retail, third party, outbound.	“Who am I speaking to today?”
3. Verify	Follow the matching Green/Red and caller-type verification route. Do not access or disclose booking information early.	“Before I access the booking, I’ll just need to complete a few security checks.”
4. Discover	Let the customer explain. Ask open questions. Summarise the desired outcome.	“Tell me a little more about what you would like to change.”
5. Check	Review booking, history, notes, service lines, status, dates, eligibility, price and policy.	“I’ll review the booking and check the options available.”
6. Resolve	Offer the best valid option. Explain costs and consequences. Obtain clear consent before action.	“The option available is [X], and the cost would be [Y]. Are you happy for me to proceed?”
7. Read back	Confirm exactly what changed, what stayed the same, price/payment impact and next steps.	“Just to confirm, we have changed [X] to [Y]…”
8. Memo + close	Save, memo, case reference, expectation-setting, relevant ancillary/app offer, tailored close.	“Is there anything else I can help you with today?”

WHEN YOU NEED TO PUT THE CUSTOMER ON HOLD

Explain what you are checking, why it matters, and what you will do next. Return with an update even when the answer is not ready. Never leave silence unexplained.

Conversation control: remember “L-S-C”

LISTEN	SUMMARISE	CONFIRM

- Listen without interrupting. Acknowledge emotion before explaining policy.
- Summarise the exact request in one sentence: “So you would like to move the departure date, keeping the same destination and duration.”
- Confirm the outcome before making any change. Do not assume what “change my holiday” means.

03 / CRITICAL / DO NOT IMPROVISE

GDPR and identity verification

NON-NEGOTIABLE

No booking-specific disclosure or action before the correct verification and authorisation route is satisfied. If anything is unclear, stop and follow the current GDPR guidance or ask a Team Leader.

Inbound verification matrix from your notes

Caller / scenario	Green call	Red call	Key control
Customer	Confirm full name.	Booking reference + departure date + full name.	Do not confuse “knowing a booking reference” with being authorised.
Retail store	Confirm store ABTA number.	Booking reference + departure date + store ABTA number.	Use the correct retail verification process.
Non-lead passenger	Check authorisation and confirm lead passenger full name.	Apply the required red checks plus non-lead authorisation check.	If not authorised, disclose no booking details. Notes say general questions/payments may still be handled; follow live rules.
Third-party agent	Use the third-party verification route.	Source notes specify booking reference, departure date and ABTA-related checks depending on the process.	Do not reveal booking details before completing the required checks.

The supplied material includes a separate Red/3PA example using ABTA number, lead passenger DOB and phone number. It also includes a retail process using booking reference, departure date and ABTA. These are not interchangeable: use the exact current process for the call type.

Outbound calls - remember the direction changes

Who you call	What the notes say to do
Customer	Confirm you are speaking to the lead passenger by mentioning their name; confirm departure date; mention call recording.
Retail store	Give/confirm booking reference first, then confirm lead passenger full name and store ABTA; mention recording.
Third-party agent	Provide booking reference, lead passenger full name and departure date; confirm ABTA and lead passenger DOB; mention recording.

Non-lead decision

CALLER IS NOT LEAD	CHECK INVOLVED PARTIES	AUTHORISED?	YES: CONTINUE / NO: STOP DISCLOSURE

- If authorised: verify the lead passenger name as required, then continue only within the authorisation scope.
- If not authorised: explain that the lead passenger must contact TUI to authorise them. Do not reveal booking-specific information.
- A previous agent’s “GDPR passed” note does not replace fresh verification on a cold transfer, according to the supplied scenario notes.

> *“Before I access the booking, I’ll just need to complete the security checks for this type of call.”*
>
> *“I’m sorry, but I’m unable to discuss booking-specific details until the lead passenger has authorised you.”*

04 / CALL TECHNIQUE

Questioning that uncovers the real request

Use open questions first, closed questions last

Question type	Purpose	Examples
Open	Explore the story, reason and desired result.	“What prompted the change?” / “What would your ideal outcome look like?”
Probing	Find details that affect availability, policy or price.	“How many nights?” / “Are your dates flexible?” / “Which passengers are affected?”
Closed	Confirm a detail or obtain consent.	“Is that correct?” / “Are you happy for me to proceed?”

The “WHY → WHAT → WHEN → FLEXIBILITY” sequence

WHY? Reason	WHAT? Exact change	WHEN? Dates / timing	FLEX? Alternatives

For a change request, ask only the questions needed for that change. This keeps the call natural rather than sounding like an interrogation.

High-value question bank

Situation	Ask
General	“Can you tell me a little more about what happened?”
Dates	“What dates would you ideally like, and how flexible are you by a few days?”
Duration	“How many additional or fewer nights are you looking for?”
Room	“What room type do you have now, and what would you prefer?”
Party size	“Which passengers are changing, and how many rooms will you need?”
Price concern	“Would you like me to explain the price difference before we decide?”
Cancellation	“May I ask what is prompting you to consider cancelling?”
Options	“If your first choice is unavailable, what would be your next preference?”
Final confirmation	“Just to confirm, you want [full summary]. Is that correct?”

DO NOT ASK QUESTIONS JUST TO FILL SILENCE

Every question should help you identify the customer’s goal, verify a fact, check eligibility, calculate an impact, or secure informed consent.

04A / SCENARIO QUESTION PATHS

Ask the right questions before choosing the system action

Use the questions in order, but do not ask every question on every call. Choose the path that matches the customer's request, then connect the answer to the correct booking component and checks.

CUSTOMER SITUATION	ASK IN THIS ORDER	CONNECT TO THE SYSTEM + CHECKS
DATE / DESTINATION / DURATION	1. "What is prompting the change?" 2. "What new dates would you ideally like?" 3. "How flexible are you by a few days?" 4. "Are you changing the destination, hotel or duration as well, or only the dates?"	ATCOM: Accommodation > Menu > Amend Inclusive. Check HC notes/stamps, availability, flight + hotel pairing, price, promo code, insurance line and linked services.
ROOM / BOARD / ROOM ASSIGNMENT	1. "What room type are you currently booked in?" 2. "What room type would you prefer?" 3. "How many rooms and passengers will be affected?" 4. "Are there any specific room requirements?"	ATCOM: Amend Accommodation / Modify Board / Service > Assign. Check room occupancy, passenger mix, board code, price and linked services.
ADD / REMOVE A PASSENGER OR INFANT	1. "Which passenger would you like to add or remove?" 2. "What is the passenger's age / date of birth?" 3. "Will the infant need their own flight seat?" 4. "Will a car seat be used on board?"	ATCOM: Accommodation > Amend Inclusive for passenger changes. Infant with a seat: quote child-seat price first, then Flight > Amend Transport Pair. Check extras, services, occupancy and memo.
CANCELLATION REQUEST	1. "May I ask what is prompting you to consider cancelling?" 2. "Has something specific changed that is affecting your travel plans?" 3. "Would changing dates, accommodation or flight times help?" 4. "Do you have travel insurance for this situation?"	Before cancelling: check incidents / HC / exceptions, alternatives, deposit status, current fee rules and third-party supplier items. Process only after clear consent.
SEATS / BAGGAGE / FLIGHT EXTRAS	1. "Which passengers would you like to add this for?" 2. "Would you prefer a window, aisle or seats together?" 3. "Would extra legroom or extra space make the journey more comfortable?" 4. "Would you like me to check and add the available option?"	ATCOM: Flight line > Menu > Flight Extras. Check availability and price; never promise an extra that is not available. Read back the selected passengers and extras.
PAYMENT / REFUND / BOOKING TRANSFER	1. "Are you making a payment / refund to a customer, or moving funds between bookings?" 2. "Which booking is the money coming from?" 3. "Which booking should receive it?" 4. "Can I confirm the amount and the balance shown?"	Choose integrated vs non-integrated route. Check APEX status, amount sign, source/destination references, balance and authorisation. Never store card details in notes.
SERVICE ISSUE / COMPLAINT	1. "Can you tell me exactly what happened?" 2. "When did this happen?" 3. "Have you contacted us about this before?" 4. "Has anything already been resolved or offered?"	Check booking history and existing cases first. Identify whether this is a TUI service failure, brochure/web inaccuracy, HC external cost or post-travel matter; use the correct route and memo.
1 ASK 2 CLARIFY	3 CHECK POLICY 4 SYSTEM ACTION	5 GET CONSENT 6 READ BACK + MEMO

Memory link: the customer's answer tells you which booking component to select. The component determines the system action. The action then determines the price / policy checks, read-back and memo.

05 / SYSTEM MAP

ATCOM: think in service lines

The practical ATCOM rule is: identify which part of the booking you are changing, select that service line, then choose the matching action. The exact screen labels can vary with the workflow and system version.

RECALL BOOKING	IDENTIFY SERVICE LINE	MENU / SERVICE ACTION	CHECK PRICE + ERRATA	READ BACK	SAVE + MEMO

Customer request	Where to start (from notes)	Typical action
Add / remove passenger; amend dates, destination, hotel or duration	Accommodation service line	Menu > Amend Inclusive
Add another room	Accommodation service line	Menu > Amend Accommodation
Change room type	Accommodation service line	Menu > Amend Accommodation
Change board basis	Accommodation service line	Menu > Modify Board or modify external accommodation details as applicable
Change room assignment	Accommodation service line	Service > Assign
Add baggage, meals or seats	Flight service line	Menu > Flight Extras
Add taxi / late checkout / accommodation-linked service	Accommodation service line	Menu > Add Item to Accommodation
Remove a service	Relevant service line	Menu > Remove Item
Add discount / promotional code	Booking-level offer area	Three dots > Promotional Offer

Before you click: the 6-point check

- Correct booking and correct passenger(s).
- Correct service line selected (flight vs accommodation vs service).
- Correct action for the request (inclusive vs accommodation-only vs extras).
- Occupancy, passenger ages, room quantity and flight pair checked.
- Costs, fees, discounts, insurance impact and stop-sale rules checked.
- Errata reviewed; customer consent obtained before saving.

COMMON ATCOM FINISHING SEQUENCE

Review what changed → read any relevant errata → give full read-back → save → add the correct memo → verify the booking overview and balance.

06 / SYSTEM PRACTICE

ATCOM amendments: quick action guide

Task	Process logic to remember	Final checks
Add passenger	Accommodation > Menu > Amend Inclusive. Update passenger/room counts, search, retain the correct flights, select room/occupancy, enter details.	Extras/services for the new passenger; TUI Care Foundation on all eligible passengers; errata, read-back, save, memo.
Add infant without seat	Amend Inclusive; confirm room allows infant; add infant details.	Check services/extras, errata, read-back, save, memo.
Add room	Accommodation > Menu > Amend Accommodation; update rooms and passenger count; search and choose room/occupancy.	Check linked services, read-back, save, memo.
Add baggage / meal / seats	Flight line > Menu > Flight Extras; select what is available.	Do not promise an unavailable extra. Errata, read-back, save, memo.
Add private taxi / late checkout	Accommodation line > Menu > Add Item to Accommodation.	Check date, passengers, availability and cost.
Change date / destination / hotel / duration	Accommodation > Menu > Amend Inclusive. Rebuild the inclusive package with correct flight, hotel, room and duration.	Check existing promo codes, insurance service line, flight extras, services and foundation contribution.
Change room type	Accommodation > Menu > Amend Accommodation. Select room type and quantity by occupancy.	Check services, price and room details.
Change board basis	Use Modify Board or the appropriate external accommodation edit flow.	Confirm the internal board code matches what was sold; check price and confirmation.
Change room assignment	Service > Assign; reassign passengers to rooms.	Do not accidentally change adult/child composition or room occupancy.
Correct name	Passenger section > Modify; enter details exactly as passport.	Use correct name-change route; memo and re-check flight extras.
Infant gets a seat	Quote child-seat price separately first. Flight line > Amend Transport Pair; change infant to child aged 2.	Use quoted child price; apply PRID/PRII if instructed; SSR INCS on SkySpeed only when car seat applies; window-seat rule in notes.
Change lead passenger	Passenger > Modify; select new Lead Pax and update contact info.	Both old and new lead must confirm acceptance, per notes.
Non-lead authorisation	Lead passenger must call; add NLA/NLDA memo with passenger name and exact authority.	Record what the person is authorised to do.
Remove passenger	Amend Inclusive; adjust passengers/rooms; untick passenger and proceed.	Remove extras/services and TUI Care Foundation from removed passenger; check new occupancy.
Remove lead passenger	Remove passenger, then complete lead-passenger change process.	Old and new lead confirmation required per notes.

SYSTEM HABIT

The action is not complete when the screen accepts it. It is complete when the booking, price, services, customer understanding and memo all agree.

07 / MONEY LOGIC

Pricing, stop sales and adjustment codes

Stop-sale override: approval decision

Scenario in the notes	Action
Board change within an existing booking	Override may be allowed without Commercial approval, following the current process.
Remove passengers while retaining same room type / occupancy remains valid	Override may be allowed without Commercial approval.
Add passenger within room maximum occupancy	Override may be allowed without Commercial approval.
Add another room	Contact Commercial first; do not override before approval.
Change travel dates	Contact Commercial first; do not override before approval.

STOP-SALE MEMORY RULE

Existing booking adjustment within permitted occupancy may be different from adding inventory or changing dates. When it requires new availability, seek Commercial approval first.

Adjustment codes you must recognise

Code	Use described in your notes	Memory cue
PRII	Add price back to accommodation / apply a price increase.	Increase the booking cost.
PRID	Used with PRII in specified price adjustments, including infant-to-child seat quote matching.	Price difference adjustment; confirm exact use.
BPD	Split a price difference adjustment across passengers to retain original price.	Booking price difference.
OLDR	Reapply a previous digital/compensation voucher; include original booking reference in reason.	Old voucher / discount.
HCMH	Hold a lower-cost difference temporarily (notes state 10 days) to prevent immediate auto-refund.	Hold money.
TRD	Booking adjustment code if the original promo code cannot be reapplied after eligible HC amendment.	Recreate original discount value.
AFEE	Add amendment fees via Manual Prices, based on current T&Cs table.	Add fee.
CANS	Waive/remove cancellation fee; enter waiver as a negative amount in the relevant process.	Cancel fee adjustment.
CCEM + CCEB / CCEE / CCEH	Pre-Travel empowerment for web/brochure issue, service failure or HC external costs.	Compensation gesture; reason code matters.

Split adjustments evenly across passengers where instructed. Check rounding carefully: the lead passenger may carry the 1p remainder, as in the source example.

Promo code after amendment

1. Record the original promo code and original discount before starting the amendment.
2. Try to reapply the original code first and validate its current terms.
3. If it cannot be reapplied and the case is eligible, use the specified adjustment route (TRD / HCMH in the supplied notes).
4. Remove an incorrect original promo entry if it remains on the booking with the wrong value.
5. Memo the original code, amount, reason and what was done. Check current policy and approval rules.

08 / HIGH-RISK PROCESS

Payments and refunds: choose the right route

First decision: is actual money moving?

CUSTOMER PAYS / GETS REFUND	INTEGRATED PAYMENT	BOOKING-TO-BOOKING TRANSFER	NON-INTEGRATED PROCESS

Type	Meaning	Examples / control
Integrated payment	Actual money is charged to or refunded to a customer card.	New payment, balance payment, payment on an existing booking. Follow the payment page and approved recording pause process.
Non-integrated payment/refund	Moves an amount between bookings; it is not a new customer card charge/refund.	Repackage, continued room, eligible cancel-and-rebook or booking reinstatement situations. Notes say direct customers only; retail/third-party follow their own route.
Direct Debit	Scheduled bank payments.	ATCOM may adjust instalments after amendment. The supplied notes say wait at least 5 days after the latest Direct Debit before processing some refunds; confirm current finance guidance.
Pay by Link	Customer completes a secure online payment from a link.	Explain the process, select amount/branding, confirm email, remain in the payment flow and verify completion.

Payment status: APEX quick recognition

Status	Meaning in the supplied notes	What it tells you
AUTHORISED	Approved by acquirer.	Not the same as settled cash; may be captured or cancelled.
CAPTURED	Queued for processing.	Check current transaction state before attempting further action.
SETTLED	Successfully processed.	Refund eligibility may apply.
REFUNDED	Successfully refunded.	Check whether partial refund is still possible.
FAILED / DECLINED	Processing failure / issuer declined.	Do not tell customer payment succeeded.
PENDING / 3DS_REQUIRED	Awaiting processing or customer authentication.	Explain next step; verify final status.
CANCELLED / CHARGEBACK	Cancelled / cardholder disputed.	Escalate or follow the dedicated process.

CARD-DATA SAFETY

Pause call recording whenever the approved process requires it before collecting payment details. Never copy full card numbers, CVV, passwords or payment credentials into a personal note, sticky note, memo or this study pack. Use only the secure approved payment screen.

Non-integrated transfer: the logic

- Refund/transfer out of the source booking: confirm the correct balance and payment record; use the approved non-integrated refund workflow; note the receiving booking reference.
- Payment/transfer into the destination booking: open the receiving booking; use the approved non-integrated payment workflow; note the source booking reference.
- Check amount sign, currency, payment reference and the final balances on both bookings. Follow the required authorisation route.

The notes contain screen-by-screen steps but also suggest copying card details to a sticky note. Do not follow that storage instruction; use the secure system workflow and current finance guidance instead.

09 / DECISION PATHWAY

Cancellation: save first, then process correctly

UNDERSTAND WHY	CHECK HC / EXCEPTIONS	OFFER ALTERNATIVES	EXPLAIN FEES	CONFIRM CONSENT	PROCESS + MEMO

Before cancellation, ask

- What is prompting the customer to cancel?
- Is there an issue that could be fixed by changing dates, destination, hotel, room or flight?
- Is this linked to a TUI-led change, an incident, a service failure or an exception?
- Are there insurance options the customer should discuss with their insurer?
- Have all required deposits been paid and have you checked the booking notes and supplier services?

Save-the-sale options

Need / concern	Explore
Dates no longer work	Alternative departure dates or duration.
Accommodation issue	Alternative hotel or room in the same area.
Flight-time concern	Available flight alternatives; follow timing-change policy.
Price / affordability	Eligible rebooking route or HC incentive; explain exact terms and limits.
Unforeseen personal event	Ask whether travel insurance may cover the circumstances; do not promise acceptance of a claim.

> *"Before we proceed with cancellation, I'd like to explore whether there is an alternative that would work better for you."*

If the customer still wants to cancel

1. Check current cancellation policy by booking type, departure date and days to departure. Calculate the fee from the live table/system, not memory.
2. Explain the exact fee, refund estimate, any deposit requirement and expected refund timeline. Ask whether the customer understands.
3. Obtain clear confirmation to proceed. Do not interpret silence as consent.
4. Process via the correct cancellation action; select the reason and add a clear explanation.
5. Check the resulting balance/refund and confirm what happens next.
6. Check separately booked third-party items (parking, lounges, transfers, excursions). They may not cancel automatically.
7. Save and add the correct memo, including CAR where a code changes a cost.

IMPORTANT SOURCE CONFLICT

Your notes contain both fixed per-person examples (£200 short haul / £250 long haul) and percentage-based cancellation examples. They cannot be treated as one universal rule. Use the live T&Cs/cancellation table and ATCOM calculation for the customer's booking.

10 / CRM MAP

C4C: customer, booking and case logic

C4C is the customer relationship and case-management view. ATCOM holds the booking and operational changes. Your mental model: C4C tells you who / what case / what history; ATCOM tells you what is booked / what changed / what it costs.

C4C: FIND CUSTOMER	CHECK CUSTOMER + BOOKING CASES	OPEN RIGHT BOOKING	ATCOM: ACTION	C4C: CASE NOTE / FOLLOW-UP

Core C4C workflow

1. Open C4C from the approved route (notes: Smile > Quick Links > Cases > Agent Desktop; use Chrome or Edge).
2. Search using at least two customer data points where applicable. Booking lookup notes use the UK_ prefix before the booking reference.
3. Open the correct customer or booking record. Confirm lead customer and involved parties.
4. Check existing cases under both Customer and Booking tabs. Avoid duplicate cases.
5. Create a case only when needed; link it to the correct customer and booking, choose the correct case type and complete required fields.
6. Add clear notes, attachments if required, owner/team and next step. Save, then refresh to confirm the update.

GDPR scenario handling in C4C

Scenario	Decision / case action
Caller says they are lead but name differs	Check Lead Customer in Booking View and Involved Parties. If not authorised, stop disclosure and document refusal.
Non-lead is not authorised	Do not disclose booking details. Explain lead passenger must authorise/add them. Record why you could not proceed.
Third party refuses checks	Do not search or disclose until third-party verification is complete.
Wrong DOB / legal name change	Use Customer View > Contact Info and the approved amendment route. Request documents if required; raise RFI/case as instructed.
Lead passenger unavailable, exceptional circumstances	Follow indemnity route: create RFI case, request signed form, attach when received, escalate for approval and monitor.
Cold transfer says GDPR passed	Repeat verification from scratch; add note that fresh/second GDPR was completed.
No booking reference / multiple bookings	Search the customer record, review Bookings, identify the correct trip, then complete checks for that booking.

DO NOT MIX THE SYSTEMS

C4C case note does not replace the ATCOM booking memo. Add the appropriate record in each system when the workflow requires both.

11 / ESCALATION

Who handles what? Team routing map

Team	Send / refer when the issue is…	Remember
Holiday Change (HC)	Booking change incidents: overbooking, room change, facilities lost, hotel/product issues.	Check existing HC notes/stamps before promising a route.
After Travel	Post-holiday complaints, feedback, compensation and cases not resolved within the noted 28-day period.	Use the current Pre-Travel form/contact route for chasing.
Detractor Team	Post-holiday survey scores 0–3, missed callbacks.	Part of After Travel.
Pre-Flight Customer Logistics	Flight/customer logistics, full name changes requiring unchecking, specific flight-related requests.	Notes state Teams channel route; 48-hour response time recorded in material. Verify current channel/SLA.
Directors Team	Urgent / escalated pre-travel matters, press cases, departures within 14 days, exceptional circumstances.	Follow escalation acknowledgement steps.
TUI Tours Team	Any named tour booking, tour amendments, tour after-travel complaints.	Named tour means route to Tours, not generic 3PF.
TUI Tours Design Your Trip CoE	New platform navigation, failed bookings, amendments/cancellations for Design Your Trip.	Notes list Mon–Sat 9am–5pm; phone/email may change - verify directory.
Flight Trading	Flight incidents, seat movements, flight timing changes, cancellations, repackages.	Use for operational/commercial flight decisions as defined.
3PF Team	Dynamic packages, third-party flights, multicentre bookings without a named tour.	Do not handle as a standard committed-allocation package.
Musement / EAT	Experience and excursion upgrades, confirmations, missed Local Expert appointment refunds.	Check supplier/product ownership.
Assisted Travel	Accessibility needs, mobility assistance, airport support, medical equipment.	Use current contact details and specialist process.
24/7 Experience Centre	Customer currently in resort / on holiday needing urgent support.	Accessible through the TUI app, according to notes.
Legal Team	Legal proceedings or complex legal complaints.	Escalate through approved management route.
Quality Monitoring	Call quality feedback and performance coaching (Calabrio in notes).	Not a customer case-resolution team.

ROUTING SHORTCUT

Named tour? → TUI Tours. Dynamic / third-party flight or multicentre without tour? → 3PF. Flight operations / timing / seat movement? → Flight Trading. Post-holiday complaint? → After Travel.

12 / QUALITY

Customer experience and relevant sales

The four quality pillars

Pillar	What a strong call sounds / looks like
Customer Focus	Warm welcome, active listening, empathy, personalised language, pace and tone matched to the customer, tailored close.
Sales Excellence	Relevant ancillary / upgrade offer with a personal benefit; clear attempt to close; save cancellation by exploring valid alternatives.
Expertise	Correct GDPR, policy, booking process, fees, payment security, system use and complete notes.
Efficiency	Good probing questions, first-contact resolution, confident system navigation, clear expectations and no unnecessary repetition.

Make the offer feel relevant, not scripted

Product	Customer benefit to connect to	Close
Seat selection (SYS)	Choose window/aisle or sit with companions.	“Would you like me to add seat selection for you today?”
Extra Legroom (XLEG)	More leg space; useful for taller customers or longer flights.	“Would extra legroom make the journey more comfortable?”
Extra Space (XSPC)	More personal room during the flight.	“Would you like me to check the extra-space options?”
Premium seat	Premium seating on long-haul flights only, per notes.	“Would you like me to check whether Premium seating is available?”
TUI app	Checklist, check-in / boarding pass, flight and transfer info, booking details, weather.	“Have you downloaded the TUI app? It keeps your key holiday information together.”
Airport hotel / parking	Convenience before departure; check actual availability.	“Would it help if I checked airport hotel or parking options?”
Insurance	May offer cover for eligible unforeseen events; insurer assesses claims.	“Do you have travel insurance? Your insurer can advise whether this situation is covered.”

> **SALES RULE**
> Offer only what is relevant, available and permitted. Explain the benefit before the price, ask for the sale, and accept “no” professionally.

TUI app short script

> *“Before you travel, I’d recommend downloading the free TUI app. It brings your booking details together and can help with your travel checklist, check-in and boarding pass, live flight times, transfer information and destination weather. I’d suggest downloading any important documents before you travel, as some features work best with an internet connection.”*

13 / MEMORY SHEET

Quick-reference codes and abbreviations

Code	Meaning / use
BO / BEM	Standard booking memo.
BE / BEN	Balance extension memo.
NLA / NLDA	Non-lead authorisation memo.
QSM	Quick Service Memo for a specific service line.
CAR	Code used / Amount applied / Reason for use.
HC-HCPA	Holiday Change with alternative; RBI applies.
HC-HCPC	Holiday Change; free amend with RBI or cancel.
HC-HCDC	Holiday Change; free amend.
HC-HCDX	Holiday Change; free amend with promo or cancel.
HC-HCDF	Holiday Change; free amend with promo.
HC-HCN	Holiday Change notes.
HC-ABM	Alternative booking manager approval.
HC-APP	Holiday Change approval.
HC-HCEX	Holiday Change stamp extension.
HC-HTPF	Holiday Change third-party flying.
HC-NEGB	Negative balance.
QSM / API	Quick Service Memo / Advanced Passenger Information.
SSR / SYS	Special Service Request / Select Your Seat.
XLEG / XSPC	Extra Legroom / Extra Space.
3PF / PAX	Third Party Flights / Passengers.
OB / IB	Outbound / Inbound flight.
MAAS	Meet and Assist.
WCHC / WCHR / WCHS	Wheelchair assistance codes; exact assistance type must be checked.
WELF / WELA / WELT	Welfare remarks: flight / accommodation / flight taxi.
WEN	Welfare notes.
RETN / REPT / REBN / REIN	Retail notes / Package Travel Regulations notes / Retail Booking Notes / Insurance Notes.
COB	Close of Business.
RFI	Request for Information (case type in notes).

ABTA numbers recorded in your notes

Use	ABTA
Direct customer - FC	01075
Flight-only ABTA (source also labels this “FO ABTA”; confirm local usage)	H1079
Package holiday ABTA	H6265

14 / USE WITH CAUTION

Timings and policy dates

DO NOT LEARN THIS PAGE AS A PERMANENT POLICY PROMISE

These are timeframes transcribed from your supplied notes. Some are historical or can vary by booking date, product, season and policy update. In a live call, check TUI Know-How / current terms before quoting or processing.

Topic	Timing recorded in the notes	Check before using
COB changes / cancellation	Free by Contact Centre close on the day after booking; exception for bookings within 14 days of departure.	Booking eligibility and live COB rule.
TUI Flex bookings up to 6 Apr 2025	Changes and cancellations up to 28 days before departure; purchase window at booking and more than 90 days before departure.	Historical booking cohort; do not apply to newer bookings.
TUI Flex bookings from 7 Apr 2025	Amendments only up to 28 days before departure; purchase window at booking and up to 90 days before departure.	Check current product terms.
Balance - TUI beach package / river cruise / 3PF shorthaul from 23 Jun 2025	30 days before departure.	Confirm booking date and product type.
Balance - 3PF longhaul from 23 Jun 2025	84 days before departure.	Confirm current 3PF payment rule.
Bookings before 23 Jun 2025	Balance due 12 weeks / 84 days before departure.	Historic cohort rule.
Balance extension	Standard up to 14 days; exceptional further 7 days (21 total); final deadline 70 days before travel; automatic cancellation at 63 days if unpaid.	Check current limits, approval and system status.
Holiday vouchers	18 months validity; not redeemable within 14 days of departure; full payment within 12 weeks of departure.	Check voucher T&Cs and exact voucher type.
Pay By Link last-minute	10 minutes from email-link click recorded in notes.	Check current payment-link validity.
Wedding contract	Return within 7 days if not completed in store.	Check booking-specific requirements.
Stamped bookings	Escalation if more than 10 days since booking stamped.	Check stamp type and current workflow.

Other numerical rules in the notes

- Admin-fee check: compare what the customer has paid with deposit + admin fees. If paid exceeds that total, the notes say do not collect an additional fee now; if below, collect the required amount immediately. Verify live payment rules.
- Direct Debit refunds: notes say wait at least 5 days after the customer's most recent Direct Debit before some refunds. Integrated refund notes separately state that a payment must have been on the system for at least 24 hours. These apply to different processes; confirm current route.
- Pre-Travel empowerment: notes record adviser limits of £100 per person / £200 per booking and manager limit of £300 per booking (or 10% for high-value bookings). Check current authority and criteria.

15 / FINISH THE JOB

Read-back, errata and booking notes

Full read-back: the customer should know exactly what they have

Read back	Examples of what to confirm
Flights	Outbound and inbound dates, airports, flight times and relevant flight changes.
Passengers	Names and passenger types / ages as required by the relevant process.
Accommodation	Hotel, room type, number of rooms, board basis and duration.
Extras and services	Seats, baggage, meals, transfers, excursions, airport parking/hotel and other services.
Money	New total, amount paid, amount due, fees, refund/credit and payment schedule.
Important information	Errata, transfer timings, Travel Aware / package-travel information and other mandatory notices.
Next steps	Confirmation email, timeframe, outstanding action, team/case follow-up and who will contact whom.

> *"Just to confirm, your outbound flight is [date/time] from [airport], returning on [date/time]. You are staying at [hotel] in [room/board basis] for [duration]. We have [extras/services]. Your new holiday total is [amount], with [payment/refund details]. Is everything correct?"*

Memos: the minimum standard

WHAT HAPPENED?	WHAT DID YOU DO?	CODE + AMOUNT?	WHY?	CUSTOMER AGREED?	NEXT STEP?

Memo type	Use
BO/BEM	Standard interaction / booking note.
BE/BEN	Balance extension.
NLA/NLDA	Non-lead authority and scope.
QSM	Service-specific request or welfare note.
HC/HCN	Holiday Change note/stamp as applicable.
CAR	Mandatory cost-adjustment record: Code, Amount, Reason.

CAR IS A MEMORY ANCHOR

Whenever you add or remove a cost-adjustment code, document: C = code used, A = amount applied (include minus sign for a waiver where required), R = reason. Add the customer request, consent, result and next step too.

After-call note template

Who called / caller type: _____

GDPR route + result: _____

Reason for call: _____

Action taken + ATCOM changes: _____

C4C case reference / owner: _____

App / sales / errata / insurance: _____

Full read-back given? YES / NO

Code: _____ Amount: _____ Reason: _____

Outstanding action / promised timeframe: _____

16 / QUICK REFERENCE

SkySpeed and fast system recall

Key	Shortcut function	Remember
F1	Help	Opens help documentation.
F2	Notepad	Quick notes; do not put sensitive payment data here.
F3	Search Flights	Flight search screen.
F4	Reserved Flights	Reserved, not yet confirmed / booked flights.
F5	Passengers	Passenger details.
F6	Payments	Payment details / process.
F7	Comments	Add booking comment: F7 > Add > enter note > Save.
F8	Saving	Save flow; follow current screen prompts.
F9	Fees	View or apply fees.
F10	Retrieve Booking	Recall existing booking.
F11	Flight Information	Flight details.
F12	Log Out	Log out.
Ctrl + F4	Seat map	View / select seats.
Shift + F4	SSR availability / manifest	Check SSR availability or open manifest screen.
Ctrl + L	Payment flow shortcut	Used after save in the flow described by notes.

ATCOM navigation concepts

Area	Use it for
Booking Recall	Retrieve a booking by reference.
Locate a Booking	Find booking using other criteria when reference is missing.
Transport Locate	Flight inventory / load / manifest checks.
Service tab	Check service export status: Exported / Waiting / Failed.
Documentation tab	Booking confirmation, e-ticket, invoice, attachments.
Memos	Record customer interactions and booking changes.
Queue	Send a booking for the correct downstream processing queue; example SEATUP for seat write-back described in notes.
Maintenance > Stock	Check flight or accommodation stock availability.

SYSTEM VERSION NOTE

Your notes say a newer ATCOM version is working better. Screen positions and labels can change. Learn the business decision and service-line logic, then follow the live screen and current system instructions.

17 / MOCK CALLS

Test-call drills: practise the decisions

Scenario 1 - Customer wants to change dates

Caller: “I need to move my holiday by a week.”

Your thinking	Strong response / action
Verify	Choose correct Green/Red customer inbound route before opening details.
Discover	Ask why, preferred dates, flexibility, destination/duration unchanged? Any other passengers or room changes?
Check	Review booking type, HC notes/stamps, policy eligibility, availability, stop sale and price difference.
System	If date/destination/duration change, notes point to Accommodation > Menu > Amend Inclusive. Check flight and hotel pair, extras, services, promo code and insurance impact.
Confirm	Explain new dates, flights, room, price/payment and any change conditions. Obtain consent.
Finish	Errata + full read-back + save + memo (CAR for code adjustment) + expectation setting.

Scenario 2 - Caller is the spouse, not the lead

Caller: “My wife booked it, but I need to know the flight time.”

- Complete the required verification for the call type; do not assume relationship means authority.
- Check Involved Parties / authorisation. If authorised, confirm lead passenger identity and stay within the authority scope.
- If unauthorised, do not disclose booking details. Explain that the lead passenger must contact TUI to authorise them. Document the outcome.

Scenario 3 - Customer wants to cancel because of a personal issue

- Empathise, understand reason, check for exceptions or TUI-led issues, ask whether alternatives could help.
- Ask whether the customer has travel insurance; direct them to the insurer for claim eligibility without promising cover.
- If customer insists, check live cancellation fees and deposit requirements by booking type and departure timing. Explain refund and get explicit consent.
- Process cancellation; check negative balance/refund and separately booked third-party services; memo all actions.

18 / MOCK CALLS

Test-call drills: system and judgement

Scenario 4 - Customer wants an extra room

Caller: “We have family joining us. Can you add another room?”

- Clarify passenger count, names/ages, room configuration, occupancy and dates.
- Check availability and cost. Notes classify adding a room as requiring Commercial approval before a stop-sale override.
- Do not override first and ask later. Explain you need to confirm availability/approval, then set an accurate follow-up expectation.

Scenario 5 - Promo code disappeared after a Holiday Change

Caller: “My discount has disappeared since the amendment.”

- Check original booking price and promo code; verify original discount amount and whether amendment is eligible for the route.
- Try original code first. If it will not reapply, notes describe TRD with HCMH to preserve the value in eligible same-season HC amendments.
- Remove incorrect original code if it remains with wrong value. Document original code, amount and reason using CAR / correct memo.
- Read back the final holiday cost and explain the adjustment clearly.

Scenario 6 - A payment shows as pending

Caller: “I paid, but it still says pending.”

- Check the APEX transaction status and booking balance. Pending is not proof of successful settlement.
- Do not take a duplicate payment until the true status and approved process are confirmed.
- Explain what you can verify, follow the payment support route if unresolved, and document transaction reference/status.

Scenario 7 - Customer asks for a seat with more space

- Ask what matters: sit together, aisle/window, legroom, personal space, long-haul premium option.
- Check actual availability and passenger eligibility. Explain the benefit and cost before asking to add it.
- Use Flight Extras / correct seat workflow, complete read-back and memo.

> **HOW TO SCORE YOURSELF**
> Did I verify correctly? Did I understand the real request? Did I choose the right route? Did I explain money and get consent? Did I read back and document? A “yes” to all five is a strong call.

19 / TEST-CALL PROTECTION

Critical errors to avoid

Avoid this	Do this instead
Searching / disclosing booking details before GDPR.	Verify first, then access and disclose only what is authorised.
Assuming a spouse, friend or fellow passenger is authorised.	Check Involved Parties and exact scope of authorisation.
Accepting a previous transfer note as GDPR clearance.	Complete fresh verification on the new call.
Guessing cancellation fee, deposit or deadline.	Use current T&Cs / Know-How and booking-specific system values.
Overriding a stop sale before approval.	Separate permitted existing-booking changes from new inventory/date changes.
Quoting a promo or incentive as guaranteed.	Validate eligibility, dates, booking type, reason code and approval.
Taking a duplicate payment while status is pending.	Confirm APEX status and use the correct payment route.
Treating non-integrated transfer as a new customer card payment.	Identify source and destination booking; follow the transfer procedure.
Changing a booking but forgetting services / extras / insurance.	Review all linked components and any cancelled service lines.
Forgetting to read back, save or memo.	Use the standard finish sequence every time.
Putting card data in a memo, sticky note or personal file.	Use the secure payment process only; pause recording as instructed.
Transferring a case to the wrong team.	Classify: named tour, 3PF, flight operations, post-travel, accessibility, legal, etc.

A simple recovery line when you are unsure

> *"I want to make sure I give you the correct information, so I'm going to check the current guidance before I confirm that. I'll explain what I find and the next step."*

Confidence does not mean pretending to know. Confidence means controlling the call, checking the right source, and explaining the next step clearly.

20 / REVISION PLAN

How to master it before the test call

Three-pass study method

Pass	What to study	What you must be able to do without looking
Pass 1 - Understand	Pages 2–5 and 19. Master call flow, GDPR and questioning.	Explain the full call structure and choose the correct verification branch.
Pass 2 - Connect	Pages 6–11 and 14–16. ATCOM, payment, cancellation, C4C, memos, teams and codes.	Hear a request and say: which system, which service line, which policy check, which note.
Pass 3 - Perform	Pages 17–20. Run the scenarios aloud and time yourself.	Handle the call naturally without reading a script word for word.

Daily 25-minute practice

5 MIN Recall call map	5 MIN GDPR branches	10 MIN One mock scenario	5 MIN Codes + memo

1. Speak the opening and GDPR checks aloud until they sound natural, not robotic.
2. Pick one random customer request and ask the discovery questions without looking.
3. Say the system path and the checks before you imagine clicking anything.
4. Finish with a full read-back and a CAR memo from memory.
5. Repeat the scenario, but add a complication: non-lead caller, stop sale, promo code, payment issue or customer frustration.

The 60-second mental checklist before you answer

WHO?	GDPR?	WHY?	WHAT CHANGES?	POLICY / PRICE?	SYSTEM?	CONSENT?	READ-BACK + MEMO?

THE ONE THING TO REMEMBER

You are not being tested on how quickly you click. You are being tested on whether you protect the customer, choose the right process, explain the result and leave a complete record.

21 / FINAL RECAP

One-page desk-side cheat sheet

The call

WELCOME	IDENTIFY	GDPR	DISCOVER	CHECK	SOLVE	READ BACK	MEMO + CLOSE

The systems

System	Think
C4C	Customer, caller authority, history, case, follow-up.
ATCOM	Booking, service lines, amendments, price, balance, memo.
SkySpeed	Flight details, passenger/seat/SSR functions, shortcuts.
APEX	Payment transaction status and response codes.

The high-risk rules

- GDPR before access/disclosure. Non-lead? Check authorisation and scope.
- Extra room / date change stop sale? Commercial approval first, per supplied notes.
- Cancellation / fees / deadlines? Use current booking-specific policy, not memory.
- Payment pending? Verify status; do not duplicate charge.
- Cost code used? CAR memo. Customer impact? Full read-back.

The finish

ERRATA	READ BACK	SAVE	BO/BEM OR REQUIRED MEMO	CASE / NEXT STEP	TAILORED CLOSE

IF YOU REMEMBER ONLY ONE SENTENCE

Verify correctly. Understand completely. Check policy. Make the right system change. Confirm consent. Read back. Memo.

End of study pack. The source notes contained duplicated scripts, legacy dates and a few conflicting rules. This guide consolidates the reusable logic and flags policy-sensitive items for live verification.
